

Table 2: Pollen counts and percentages (%), total pollen and micro-charcoal concentrations, and presence of parasite eggs in the samples

*Pollen percentage calculations based on total land pollen (TLP) sum, excluding ferns, pre-Pleistocene and unidentifiable grains. Calculations for these groups are based on the main sum plus the sum of each group.

	Sample	780059						780063		780084	
	Context	782213						782216		782238	
Taxon	Depth (cm)	32		38		44		27		-	
Latin name	Common name										
Trees and shrubs		No.	%	No.	%	No.	%	No.	%	No.	%
<i>Picea abies</i>	Spruce	8	2.5	11	3.4	41	11.3	4	1.2
